
FOOD FOR LIFE GLOBAL

2020
ANNUAL
REPORT

www.ffl.org / contact@ffl.org

OUR MISSION

Food for Life Global is the world's largest vegan food relief with 211 projects in 60 countries serving up to 2 million meals daily. Our mission is to unify the world through the liberal distribution of pure, plant-based food.

While our projects vary, all are governed by the following principles:

Welfare: Provide pure plant-based meals to anyone who is disadvantaged, malnourished, a victim of disaster.

Hospitality: Revive the ancient Vedic culture of spiritual hospitality, teaching through example that spiritual equality exists among all beings.

Non-Violence: Reduce the number of animals slaughtered for food by giving as many people as possible the

higher taste of “karma-free” plant-based meals.

Health: Teach the value of plant-based meals for improving the health of the body and mind.

Education: Educate others on the art and science of food yoga as an integral part of consciousness development.

Animal Advocacy: Support animal rescue projects as a powerful way to demonstrate the equality of all life through direct experience.
